Parents and Guardians,

Thank you for taking the time to read about our newly established Robotics, Lego and Activity Camps. We understand the importance of your children staying active and also engaged in learning during the holidays and the importance of them interacting with their peers in a safe and fun environment. The aim of our camp is that your children will experience a range of new, fun and exciting robotic, Lego and physical activities under the supervision of fully qualified staff and personnel. The camp offers the opportunity for your children to explore Science, Technology, Engineering and Mathematics (STEM) using enjoyable, engaging and hands on approaches. It's also a great opportunity for your children to make new friends along the way.

We look forward to hearing from you and seeing your children in the future.

Hoop Games

Parachute Games

Obstacle Courses

Tag Games

Twister

Senior Robotics

(3rd- 6th Classes)

Our Senior Robotic Students will discover and explore Science, Technology, Engineering and Mathematics (STEM) using fun, engaging and practical approaches. I-Pads, Lego Technic and Lego EV3 Mindstorms kits will be used throughout the week at the camp to help children explore robotics, coding and programming. The children will also engage in plenty of physical activities during the camp to provide a healthy, active and fun experience.

Novice Engineers

(Infants - 2nd Class)

Our Novice Engineers will engage in a mixture of fun physical activities and STEM based educational projects using Lego. During the camp, the children will work in small groups to design and build various projects including automobiles, castles, skyscrapers and much more. The children will also be introduced to basic programming and coding concepts using suitable I-Pad applications.
